Section **1**

Studio G offers a wide selection of Interior Decorative Glass to add just the right aesthetic to your interior project.

Unique patterns, textures and levels of opacity, can be applied for privacy or used as a design element in a variety of spaces. Common decorative glass applications utilize 1/4" thick (or less) glass, including cabinet inserts, door inserts, framed & semi framed shower enclosures, privacy windows, shelving, tabletops, mirrors and more.

Our decorative glass patterns require a three-foot minimum and are custom cut to size, insuring an exact fit. Most patterns are available annealed or tempered and are offered in a variety of thicknesses, depending on the use and requirements of the installation.

Let us Help You.

Our Product Solutions Team can offer expertise with selections, application questions and provide samples, creating the most appropriate & beautiful glass solution.

Section **2**

FRAMELESS or 'EURO STYLE' SHOWER ENCLOSURES, use 'heavy glass' (3/8"-1/2" thickness) and minimal hardware, to create a clean, visually seamless design experience in the bath.

A wide variety of glass patterns, textures and opacity are available to compliment both traditional and modern designs and everything in between. We offer a multitude of hardware finishes and colors to coincide, contrast or blend with your bath fixtures & interior hardware selections.

Your interior design, finish materials and room layout will best determine the most appropriate frameless glass application. Popular choices include: a Single Swing Door, Door & Fixed Panel, Sliding Doors, Neo Angles, Stand-Alone Panels, Wet Rooms and Steam Enclosures. All enclosures are measured post tile/material installation and are custom created to size, insuring an exact fit. All shower glass must be tempered for safety and can be treated with GlassGuard™ surface protection to aid in cleaning.

Let us Help You.

Our Product Solutions Team can offer expertise with selections, application questions and provide samples, to create the most appropriate & beautiful shower enclosure solution.

Section 3

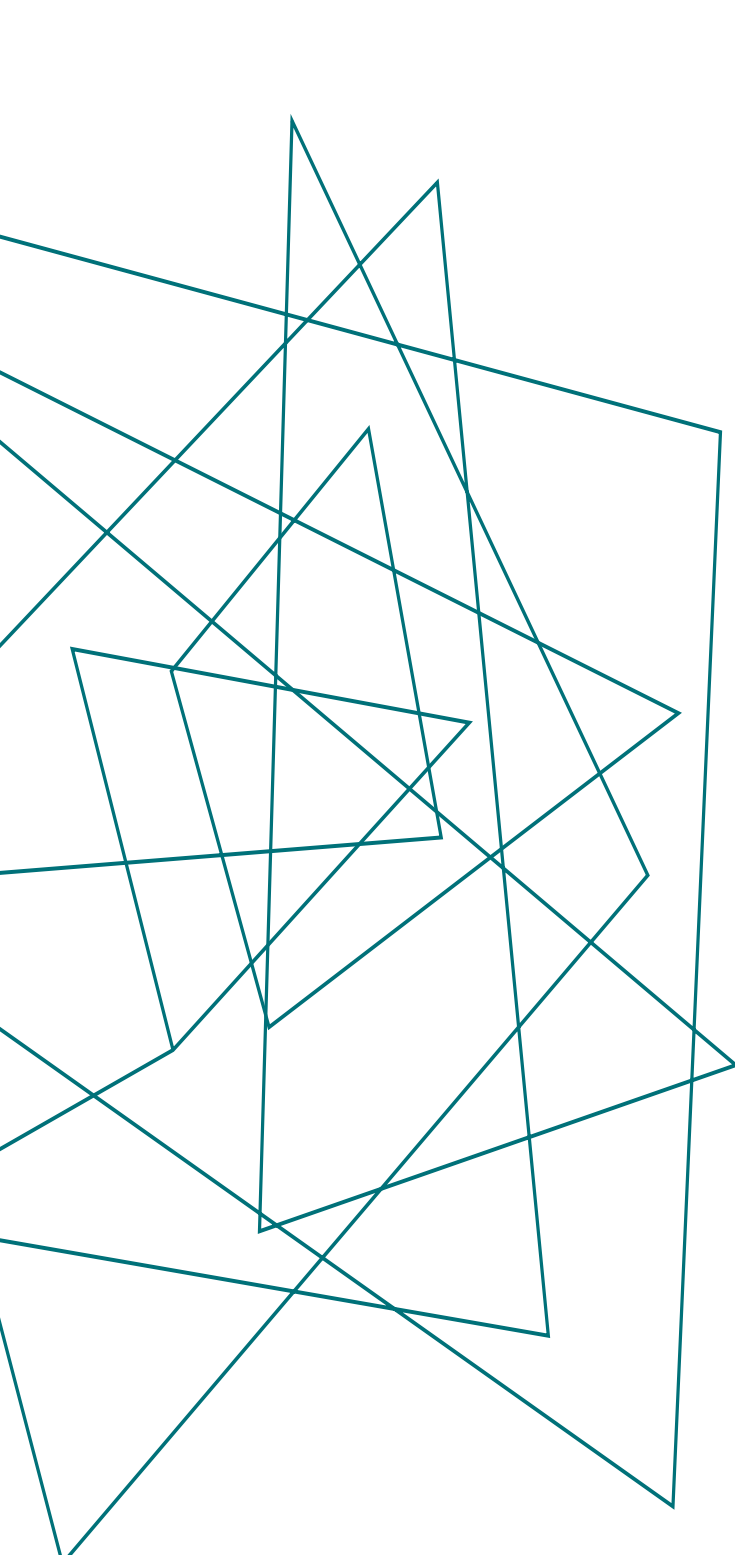

SEMI-FRAMELESS & FULL FRAME shower enclosures, typically use 3/16" or 1/4" thick glass and require a combination of extruded vertical and horizontal frame components to mount the enclosure to the shower walls or a substrate, such as a fiberglass surround.

A wide range of glass patterns, textures and opacity are available to compliment a variety of design styles and budgets. When it comes to framework, we offer seven standard hardware finishes and colors to blend beautifully with your bath fixtures & interior hardware selections.

Your interior design, finish materials and room layout will best determine the most appropriate framed or semi framed glass application. These Styles are perfectly suited to fiberglass Shower Stalls & Tubs or walls using Ceramic Tile. Popular choices include: a Single Swing Door, Door & Fixed Panel, Sliding Bypass Doors and Neo Angles. All enclosures are measured post tile/material installation and are custom created to size, insuring an exact fit. All shower glass must be tempered for safety and can be treated with GlassGuard™ surface protection to aid in cleaning.

Let us Help You.

Our Product Solutions Team can offer expertise with selections, application questions and provide samples, to create the most appropriate & beautiful shower enclosure solution.

Wine Rooms
Wind Screens
Commercial Styles

Section 4

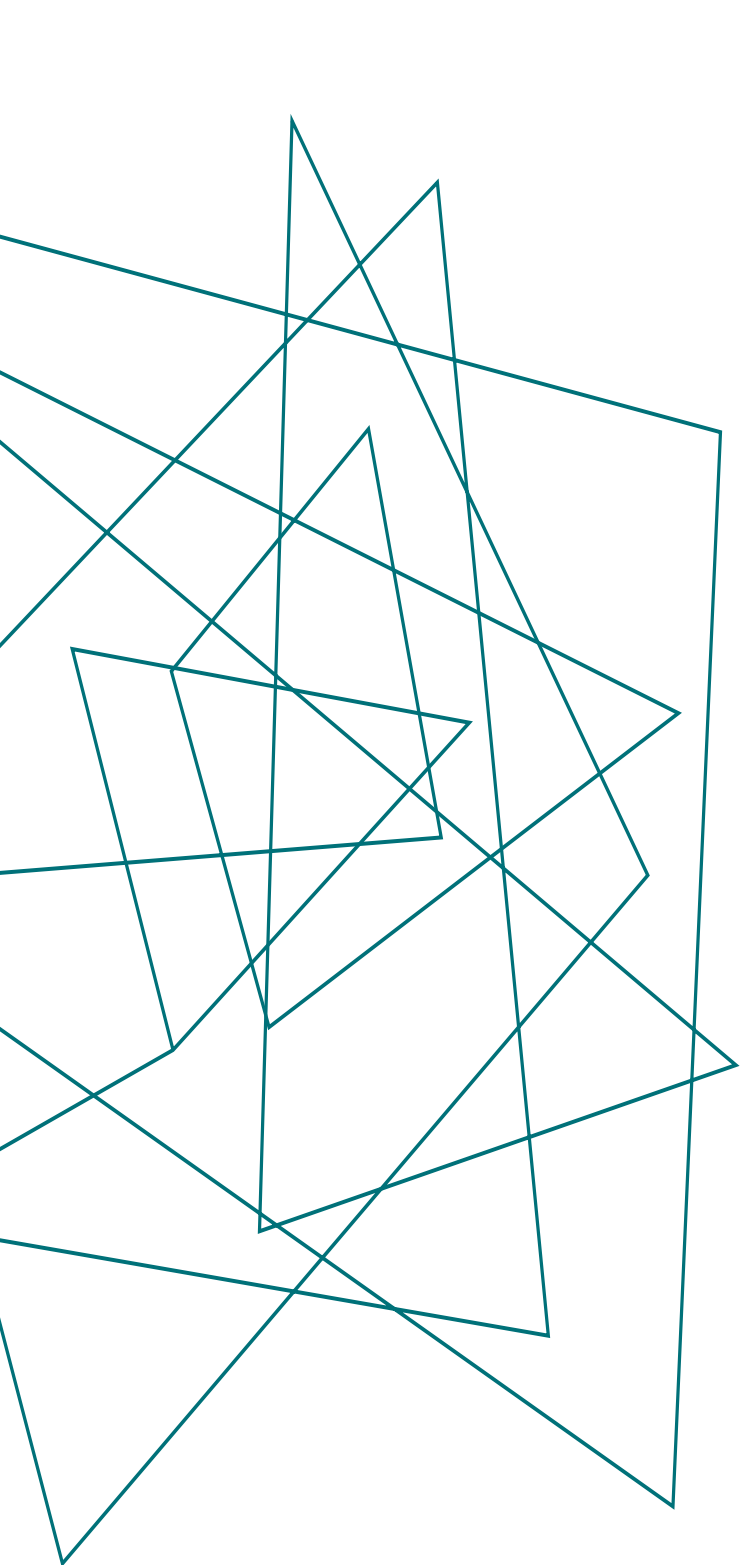

Studio G is West Michigan's expert resource when it comes to creating a wide variety of **SPECIALTY GLASS SOLUTIONS** for both inside and outside the home.

The beauty of glass can be integrated into your architectural structure to divide space or provide safety, and comfort. It can also be applied as purely an aesthetic feature, or as a sleek and sophisticated finish medium, creating a dynamic and functional interior design focal point.

Printed Glass, (typically 1/4" thickness) is limited only by your imagination in its use as well as, imagery. Stair Rails, Guard Rails and Wind screens provide a modern, floating and unobstructed view indoors or out. Custom enclosures like Wine Rooms, can be completely built out of glass, integrated into nooks and stairways, creating a unique approach to storing wine in a visible, temperature-controlled environment. Commercial Style Glass Applications can be customized to provide a fixed, framework of glass just about anywhere- providing space division or offering privacy-floor to ceiling. Due to the nature of Specialty Glass Applications, they do require the glass to be tempered and typically require 1/2" glass thickness to provide the correct level of safety, rigidity and limited flex.

Let us Help You.

Our Product Solutions Team can offer expertise with selections, application questions and provide samples, to create the most appropriate interior and exterior glass solutions.

Specialty Solutions:

Printed Glass

Section 4

Custom Glass Solutions: Printed Glass

Printed Glass Fireplace Wall/Surround Using Rich Saturated Color/Minute graphic texture to mimic Granite Without the weight or cost of a stone slab.

Our printed, 1/4" (typical) tempered glass is naturally antimicrobial, easy to clean, requires little maintenance and is inherently temperature and impact resistant. The technology used, allows for printing of the imagery directly to the back of glass-be it high-definition art, patterns or photography creating a unique design feature in the kitchen, bath or living spaces of your home, couldn't be easier or more personalized.

Studio G, Inc.

Cleaning Basics & Warranty

Section 5

Cleaning Basics:

Glass & Related Hardware

For Best Results Daily:

Rinse the shower enclosure with clean water and wipe down with a squeegee, any remaining droplets.

If desired, dry with a microfiber towel for a clean, spotless shine.

Once A Month:

Wet the shower enclosure and use a nylon body puff & a mild cleaning solution (see below) to go over the surface until clean and smooth. Then rinse with clean water, wipe down with a squeegee, and dry with a microfiber cloth.

**We recommend the following mild cleaning products
that can be used on Shower Glass with or without
GLASSGUARD™ treated surfaces:**

- **White household vinegar diluted with water (1:2 ratio)**
- **Spray Way® Ammonia-Free Glass Cleaner**
- **Seventh Generation™ Natural Glass & Surface Cleaner**
- **Simple Green®**
- **Ammonia Free-Windex®**

STUDIO G

Closets | Glass | Hardware

One-Year Limited Warranty

Thank you for Purchasing our Products,
Services & Installation!

Studio G Inc. offers a One Year Limited Warranty from the Order date or Our installation date, to the original consumer/purchaser, on materials and workmanship.

This warranty applies to hardware and materials used during the fabrication/Installation of our products and guarantees them to be free of manufacturer defects from the date of Purchase or actual Installation.

This warranty applies to Studio G supplied products: Melamine Shelving, Wire Shelving, Custom Glass & Mirror Installations, Shower Enclosures, Insulated Glass Units, Printed Glass, Handrail, Deck Railing & Storm Window and Screen Fabrication; Screen Room Applications, Decorative Cabinet Hardware, Specialty Bath Hardware, Door Hardware; & Window Coverings.

This warranty applies to our products when used and maintained, according to manufacturer recommendations under normal, residential use and conditions.

This warranty does not cover breakage, scratching, infrequency of cleaning, use of inappropriate cleaning solutions, incidental, consequential damages or owner supplied materials.

*GLASSGUARD™ surface protection & ORG Home™ products are covered under a separate limited warranty by the manufacturer. Please see the specific written manufacturer warranty for details and exclusions.

STUDIO G

Closets | Glass | Hardware

GLASSGUARD™ Warranty

GLASSGUARD™ surface protection offers a limited lifetime warranty to the original consumer purchaser when maintained according to manufacturers recommendations; not to flake, peel, discolor or change the appearance of the surface to which it is applied.

GLASSGUARD™ is guaranteed to permanently protect the glass surface and improve the hydrophobic characteristics, to make cleaning easier. GLASSGUARD™ will resist the effects of weathering and remain visually transparent when the manufacturer's proper maintenance guidelines are followed. The hydrophobic action can be maintained with normal water cleaning, and by using GLASSGUARD™ revitalizer spray. Revitalizer is available to the consumer through our dealer network to enhance or restore the hydrophobic properties portion of GLASSGUARD™, as needed.

GLASSGUARD™ is designed to protect surfaces from damaging environments, and to reduce maintenance time. GLASSGUARD™ will not eliminate cleaning, maintenance, or spotting, but will dramatically reduce the time, effort and chemicals needed to keep glass surfaces looking new.

Limitations: The GLASSGUARD™ limited warranty covers replacement glass provided from the manufacturer only, or a refund of the original sale price only, at Studio G's option. All parts replaced under the terms of this limited warranty are F.O.B. Studio G and it does not cover breakage, scratching, labor or incidental or consequential damages.

STUDIO G
